

# WINTER ENERGY SAVING TIPS

## 10 SIMPLE WAYS TO LOWER YOUR BILL AND ENERGY USE

**10%**

Save up to 10% a year by setting your thermostat back 7° to 10.°

**68°**

Setting your thermostat to 68° will keep you comfortably warm.

**55 to 60°**

Set your thermostat between 55° to 60° when you're away from home.

**1%**

Save 1% of your total heating bill for every degree you set back your thermostat.

**\$180**

By investing in a programmable or smart thermostat, you could cut energy bills by nearly \$180 per year.

### SWITCH IT UP

Run ceiling fans in a clockwise direction to push warm air down.

### CATCH SOME RAYS

Open your blinds and use the sun's natural light to heat your home.

### PLANT A WINDBREAK

Strategically placed dense evergreen trees or shrubs on the north side of your property can reduce annual home heating costs by 10 to 15 percent.

### TURN IT DOWN

When using your fireplace, turn down your thermostat to prevent your fireplace from drawing heat out of the room.

### REPLACE AND REPEAT

Replace your air filter every one to three months, or when it appears dirty.
